

All licensees of the Board need to be reminded of their statute requirement, Section 40-69-250 (D), that requires the display of their license. A license is considered to be the initial license issued by the Board and the renewal license card that is sent on the biennial renewal year when a renewal of the license is completed. Please be aware of this requirement. The license should be displayed in a prominent and conspicuous place in a person's primary place of practice.
